**Teir-2**

Q 1 What are Planetary Winds?

Q2 What are Sea breezes and Land breezes?

Q3 What is convectional Rainfall?

Q4 What is Air Pollution?

Q5 What is Acid Rain?

Q6 Mention two effects of Water Pollution.

Q7 Mention two causes of Land Pollution.

Q8 What do you mean by the windward side and the leeward side?

Q9 What is Ferrel's Law? Explain.

Q10. Give reasons:

- a. Mountaineers have to carry oxygen cylinders while travelling to high altitudes.
- b. heated air creates low pressure
- c. Winds blow from high pressure to low pressure regions.
- d. Planetary winds are named after the word planet.
- e. Cyclonic rainfall is also called Frontal Rainfall.

Q11. Give examples of the three types of winds.

Q12. What are periodic winds and local winds?

Q13. What are three R's of solid waste solution?

Q14. What is composting?

Q15. List some ways to check air pollution.

Q16. Explain the following:

- a. Global warming
- b. Ozone hole
- c. Smog

Q17. Why is water important for our planet?

Q18. Define the term:

- a. Urbanization
- b. Industrialization
- c. Vehicular emission

Q19. Differentiate between wind and current.

Q20. Define environment.
